# Task Day - 02

"Marketplace Technical Foundatio
A-A fashion Avanue"

Step 01 Technical Requirements:

1 - Frontend:

- Me next.js ka framework use kun gi take website fast aur Seo friendly ho.
- Website ko mobile aur desktop per responsive banane ke lye aur styling ke lye tailwind CSS ka use karun gi.

==PAGES==

Homepage	Product	Product detial	Cart	Checkout
↓	↓	↓	↓	↓
Trending aur feauture dresses Show kare gi	Dresses ko Filter aur Sort krne ke option hoge	Dresses ki detial, image, review, Add to Cart dikhae gi	User jo dresses Select kare yaha show hogi	User k addres or Paymu option yaha hoga

2 - Backend:

Sanity CMS use kar ke dresses or order ka data manage hoga aur grock query use kar ke API len gn jisse apne frontend me use karn gn aur sare data ke schema bana kar sanity /studio se data ko add, update, remove, delete, ya edit karn gn. Third party API use karn gn payment gatway aur shipment ke lye.

3 - User Authentication:

Email aur password ke through login/singup ke option provide karn gn user ko.
user ke lye bhi dashboard banai gn jaha wo apne order aur ~~whi~~ wishlist deakh sake.

4 - Payment Integration:

Third party API use krm gn payment gatway ke lye.
Multiple payment option provide hoga jese ke cash on delivery, credit card, wallet etc.
Payment ke bad user ko ek confirmation massege ya mail aye ga.

5- Shipping aur Order Tracking:

Shipping API use krn gm or order tracking ka option provide krn gn jis se user apne order ka status deakh sake ke order placed, Shipped, ya delivered Kb hoa.

6- Search- aur Filtering:

Homepage ke navbar me ek search bar hoga jo user ko suggestion deakhai ga.

Product ke page pe filter lagai gm jis ke through user price, size, color, type ke filter ko use kr ke easy search kar sake ga apni desire chezen.
